### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 09 September 2010.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of Species A, claims 12-17, and 20-22 in the reply filed on September 9, 2010 is acknowledged.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 22, the recitation of "with x close to 0.5" renders the claim vague and indefinite, since it is unclear as to the intended scope of the claim with respect to the value of x. For example, if x were 1, which is "close to 0.5", then the claimed cross-sectional distribution would be indeterminate, since  $1-x/x$  would equal 0/1, which does not make sense.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 12 and 21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Stringaro (Fig. 2; col. 2, lines 20-26).

Art Unit: 1776

6. Claims 12, 13, 21, and 22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 0 885 653 A2 (Fig. 1).

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0 885 653 A2 (Fig. 1).

EP 0 885 653 A2 (Fig. 1) as applied above, substantially discloses applicant's invention as recited by instant claims 14 and 15, except for clear recitation that the secondary packing elements (4,6) are formed from flat metal strips that are bent to their end use shape. The reference does clearly illustrate that the secondary packing elements are formed into a corrugated shaped, presumably from a flat material that is bent by mechanical means to have the final corrugated shape. Wherein it is notoriously well known within the art to form corrugated packing elements from sheet metal that is mechanically bent into a desired shape, it would have been obvious for an artisan at the time of the invention, to bend flat metal strips to form the secondary packing elements of the reference apparatus, since such is a convenient and conventional technique for forming corrugated packing.

***Allowable Subject Matter***

9. Claims 16, 17, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Bushey whose telephone number is 571 272-1153. The examiner can normally be reached on M-Th 6:30-5:00.
